REASONS FOR ALLOWANCE

Action Background

1. This action is responsive to the Request for Continued Examination filed on 10/24/2007.
2. Applicant has not amended any claims with this response.
3. Claims 1-6, 8, 11, 13 and 17-26 are pending in the case, claims 1, 6, 11, 17 and 22 are independent claims.
4. A request for continued examination filed under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after an allowance. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the Request for Continued Examination will be entered into the record.
5. Acknowledgement is made to the applicant's submission of an Information Disclosure Statement filed 10/24/2007.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 6, 11, 17 and 22, the prior art of record neither anticipates nor suggests to a person of ordinary skill, at the time the invention was made, the claimed method, apparatus, machine readable medium or system for modifying a database using an integration object instance as data input, where the integration object instance is built from a integration object schema, where the integration object schema defines an integration object as a plurality of components that are hierarchically related, and at least one component is a child of a parent component, and the integration object schema is extracted from a first database: where the integration object is used to modify a second database by comparing the parent component of the integration object with a record from the second database and modifying the record if the parent component matches the record; and finding child database records associated with the parent database records and comparing the child database record with the child integration object component and either modifying the child database record if a match is found or inserting a new database record if a match is not found.

Regarding independent claim 11, the claim is directed toward an apparatus. It should be noted that the apparatus is a machine as described in the originally filed specification at paragraph 55 and in Figure 8. Specifically, claim 11 is directed toward a "means for receiving input data". Paragraph 55 points out that this means plus function language is embodied as FIG. 8 illustrates an embodiment of a

machine which may be used to implement one or more components of a system.

"The machine 900 includes a processor 910, a memory 920 coupled to the processor 910 and an interface 930 coupled to the processor 910" (paragraph 55 of the originally filed specification). An interface is well known machine element used to receive input data.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Vaughn whose telephone number is (571) 272-4131. The examiner can normally be reached Monday to Friday from 8:00 am to 5:00 pm.

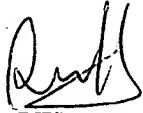

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen S. Hong can be reached at (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
